

SETTING UP FOR YOUR VIDEO INTERVIEW

Elevating your laptop will improve the appearance of eye contact. Alternatively try minimising your Zoom/Teams window and dragging near your camera.

Think about what you will look like to the other person, dress appropriately, don't have a window or light behind you but do have a light in front

Switch off phone, emails, everything with alerts

Clear your workspace, remember a notepad, pen and water

And don't forget to smile!
